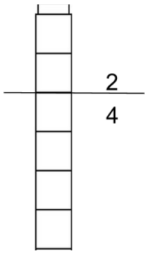
Kindergarten Weekly Newsletter

Week of January 12, 2026

Math

This week, students will practice decomposing (breaking apart) towers of 5, 6, and 7. Students will each receive cubes to create a tower and then break them apart to find two addends that equal 5, 6, or 7. They will record with a drawing and an equation.



2 + 4 = 6

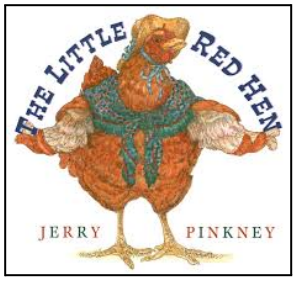
Math Vocabulary: addition, + , plus, equals, = , addend, combination, decompose

At home, ask your child to model all the ways to decompose 5, 6, or 7. For decomposing, the equation is

____ + _____ = _____

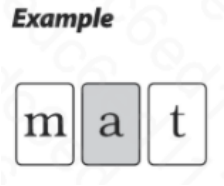
Literacy

In literacy, we will be reading *The Little Red Hen* by Jerry Pinkney. As we read this book, students will identify the characters and the setting. We will also learn how authors create a problem and resolution.



In Fundations, we will continue with Unit 2. This week, we will focus on the letter formation for uppercase letters A, B, C, D, E, F, G and H. In this unit, students will also begin to blend and read CVC words.

At home, practice segmenting 3 letter CVC words (or 4 letter CCVC if your child is ready) Tell your child to say each sound separately, then blend the sounds together.



National Dance Institute (NDI)

On Monday, January 12th, Kindergarten will be starting their enrichment program with the National Dance Institute! Once a week, K students will participate for one period. Save the date for their open classroom/performance: March 30th!
