Kindergarten Weekly Newsletter

Week of March 23, 2026

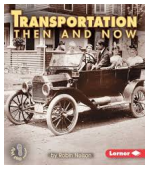
Math

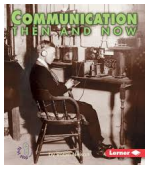
In math this week, we will continue comparing numbers 1-20 using "greater than" and "less than". Later in the week, we will practice skip counting to 100 by tens.

At home, you can practice comparing two numbers by asking, "Which is greater? Which is less?". Your child should answer using the sentence frames, "___ is greater than ___." or "____ is less than ____."

Math Vocabulary: Tens, Ones, Decompose, Ten Frame, double ten frame, before, after, greater than, less than.

Literacy





In Wit & Wisdom, we will continue our work with *Transportation Then and Now* and *Communication Then and Now*. Students will write a letter to George Washington explaining how much communication or transportation has changed since he was alive.

At home, read through books with your child and have them find the trick words we have learned so far: **in, is, the, me, and, a, are, to, I, was, we, they, his.**

This week's word is: **as**

DOE Family Survey

Students received an envelope from the DOE with your individual Family School Survey to be completed. You can also complete the survey online with your child's **unique** access code. Access codes were sent to you in an email from Olga Seliger. Please take a few minutes to complete the survey.
