Kindergarten Weekly Newsletter

Week of March 2, 2026

Math

In math, we will launch our 4th math unit! In this unit we will focus on…

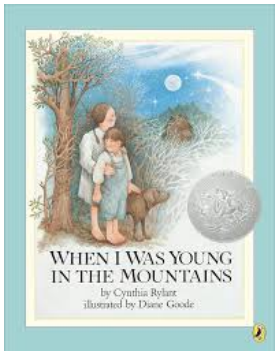
- Counting to 100 by ones and by tens.
- Composing and decomposing numbers 11-19 into ten ones and more ones.

At home, you can practice counting with your child by ones and skip counting by tens.

Math vocabulary:
decomposing, teen numbers, skip counting

Skip counting by tens									
1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Literacy



In Literacy, students will continue to reread and study When I was Young in the Mountains by Cynthia Rylant in order to answer the question, "How was Cynthia Rylant's life different from your life?" Students will start by drawing and writing how life was like when Cynthia Rylant was young (in the past) using text evidence from the book. Then students will draw and write what life is like for themselves now in the present.

In Fundations, students will continue to study "trick words" in sentences. Trick words are what we call sight words or high frequency words. They are called trick words because they have a tricky part so we cannot tap them out.

At home, read through books with your child and have them find the trick words we have learned so far:

Message from P.E.

Our K–2 students recently completed a fun and active Circuit Training Unit in Physical Education! During this unit, students rotated through different activity stations designed to build strength, balance, coordination, and heart health. Stations included activities such as jumping, balancing, curl ups, pushups, and other movement challenges appropriate for young learners.

Students practiced following directions, moving safely in shared spaces, taking turns, and encouraging their classmates. We also talked about how exercise helps keep our hearts strong, muscles healthy, and bodies energized.

I am so proud of the effort and positive attitudes students showed throughout this unit. Ask your child to demonstrate a few of the exercises we practiced, or quiz them to see if they can name some of the muscles we talked about in class. Keep encouraging your child to stay active and practice healthy movement habits at home!

Our next unit for K-2 will be Parachutes. Parachute activities help students build upper body strength, coordination, and balance as they lift, shake, and control the parachute together. Many of our games also increase heart rate, helping strengthen the heart and improve overall fitness.

Just as importantly, parachute activities teach teamwork, listening skills, and cooperation. The parachute only works when everyone participates and follows directions, making it a wonderful way to practice working together and encouraging classmates.

Best, Ms. Boiardi

Dates

- **Monday, 3/2** - School Spirit Day - wear 217 shirt or colors (**yellow/purple**), order HERE
- **Thursday, 3/12** - HALF DAY, 11:20am dismissal for Virtual Parent-Teacher Conferences
- **Tuesday, 3/17** - School Spirit Day
- **Friday, 3/20** - SCHOOLS CLOSED, Eid al-Fitr
- **Monday, 3/30** - NDI Performance, more details to come

Kindergarten Field Trip to Mount Vernon Hotel & Museum

- **K003 - Thursday, 3/5**
- **K001 - Friday, 3/13**
- **K004 - Thursday, 3/19**
- **K002 - Friday, 3/27**

App of the Month (March)

http://www.coolmath.com/

- Children can play online math games that help with addition and subtraction. This website can be used from ages 3 to 12.
